### Assignment

#### Provide educational building blocks.

The ABCs and 123s come to life as elementary school students develop the all-important building blocks for their academic years. In stimulating and healthy educational environments, students are exposed to reading, writing and arithmetic, as well as other important basics, such as science and social studies. The curricula focus on building age-appropriate problem-solving and process skills, while also challenging students to grow academically, socially, physically and emotionally.
